QUICK START

Self-service terminal

sp-terminal · 17″ screen

SHOOMS

QS-TR-EN · 09.2026

BEFORE YOU START

The terminal is placed under a canopy or indoors, next to its own field's card reader.

INSTALLATION STEPS

1. Fix the terminal in the chosen place; shooters must be able to see the screen.
2. Connect the network: a LAN cable or the range Wi-Fi.
3. Connect the power and switch the terminal on.
4. If it is a new device, calibrate the screen following the prompt on the setup page.
5. Sign in with a SHOOMS staff account and choose the field the terminal is bound to.
6. Check that this field's card reader is bound to it in the SHOOMS admin.
7. Present a test card: the shooter popup should open. Set the language and the board's appearance.

BEFORE YOU LEAVE

- [ ] Terminal fixed, screen visible from the stations
- [ ] Network connected
- [ ] Screen calibrated
- [ ] Signed in, field chosen
- [ ] The field's card reader is bound
- [ ] A test card opens the popup
- [ ] Language and appearance set
- [ ] Serial number recorded

IF SOMETHING DOES NOT WORK

The screen is black	The power; after switching on, give the terminal about a minute
«No connection to the server»	The network and the server address on the setup page
The card beeps, no popup	The reader's binding to this field
Touch lands in the wrong place	Screen calibration in management mode

The full user manual is in the documentation set or behind the QR code. SHOOMS support: support@shooms.net
